

DESIGN OPTIONS DOOR DESIGNS

▲ Sliding doors are popular because they glide smoothly and allow total access to the doorway opening. And sliding doors can't be blown shut by the wind.

DESIGN OPTIONS

COLONIAL SHED VARIATIONS

▲ There's no shortage of storage in this spacious 12-ft. by 20-ft. Colonial-style barn. It features vertical-board siding, sliding door, cupola, and cobblestone ramp.

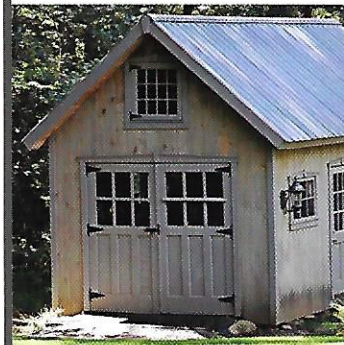

▶ This 12-ft. by 16-ft. blue-stained garden shed has two doublewide doors, which provide easy access to the interior. It also has three tilt-in barn sash windows, a transom window, and a gable roof covered with architectural-style shingles.

◀ This charming backyard building features cedar clapboards on the sidewall, board-and-batten siding on the gable end wall, and asphalt shingles on the roof. It measures 12 ft. by 14 ft., which is an ideal size for use as a storage building, garden shed, or kid's playhouse.

◀ The rustic, natural beauty of red cedar is display in this attractive 10-ft. by 14-ft. workshop. Cedar shingles cover the sidewalls; the roof made of cedar shakes. The gable wall is sided with cedar board-and-batten siding.

▲ Built as a tractor barn, this 12-ft. by 22-ft. outbuilding features vertical-board siding, standing-seam metal roof, and doublewide doors salvaged from an old dairy barn. The upper window on the gable end wall provides access to an overhead storage loft.
